

CURTIS 8 AS

Description

CURTIS 8 AS is a (non water-miscible) metal working fluid, based on highly refined mineral oils with additives.

Technical Data

	values
colour	yellow
density (15 °C)	0,83 g/cm ³
viscosity (40 °C)	8 mm ² /s
flash point	154 °C
Cu-corrosion (3h/100 °C)	1

Applications

CURTIS 8 AS is used preferably as grinding oil for light machining operations of ferrous materials as well as non-ferrous metals.

operation	materials
<ul style="list-style-type: none">grinding	(unalloyed + alloyed) steel, non-ferrous metals
<ul style="list-style-type: none">General machining / forming (milling, turning, drilling, profile rolling, punching, ect.)	Non-ferrous metals, steel

CURTIS 8 AS is used as neat oil by conventional supply.

Special features

- ✓ Use of high-quality mineral oil
- ✓ No staining of parts
- ✓ Good cooling and flushing properties
