

CURTIS BioCut 45 EP

Description

CURTIS BioCut 45 EP is a non water-miscible coolant lubricant and contains synthetic fatty acid esters and EP-additives.

Technical data

Parameter	
colour:	light brown
density (15 °C):	approx. 0,94 g/cm ³
Viscosity at 40 °C	45 mm ² /s
Flash point	> 200 °C
Cu-corrosion (3h/100° C)	4

Operational areas / Applications

CURTIS BioCut 45 EP is a metalworking fluid for medium – heavy forming operations of steel and aluminium alloys.

operation	materials
forming (bending, stamping/punching, rolling, etc.)	Steel (low and high alloyed), aluminium,
machining (thread cutting, sawing, etc.)	

CURTIS BioCut 45 EP is used as neat oil and applied by spray application or by conventional supply.

Special features

- ✓ *High-performance minimum quantity lubricant*
- ✓ *give good wear protection for the tools*
- ✓ *high EP-effect*
