

CURTIS M 4792

Description

CURTIS M 4792 is a non water-miscible coolant lubricant and contains synthetic / natural fatty acid esters and EP-additives

Technical data

Parameter	
colour:	Yellow - brown
density (15 °C):	0,90 g/cm ³
Viscosity at 40 °C	approx. 80 mm ² /s
Flash point	> 300 °C
Cu-corrosion (3h/100° C)	3

Operational areas / Applications

CURTIS M 4792 is a metalworking fluid for heavy forming/machining operations of steel and aluminium alloys.

operation	materials
forming (bending, stamping/punching/pressing, rolling, etc.)	Steel (low – high alloyed), Ti-alloys
machining (thread cutting, sawing, etc.)	

CURTIS M 4792 is used as neat oil and applied by spray application or by conventional supply.

Special features

- ✓ *High-performance minimum quantity lubricant*
- ✓ *give good wear protection for the tools*
- ✓ *low oil mist characteristics*

Technical data are representative values. All recommendations are without any obligation. Users should verify current specifications with Curtis and ascertain that products as supplied are suitable for intended applications.
